Your name	
Position with practice	

1. Were you previously aware of 'Autism: A Guide for GPs and Professionals in Worcestershire'?

- Yes - we have received the guide
- Yes - we have received the guide and used it within the practice
- No - we were not aware of the guide

Comments -

Or have you received any information from other sources about Autism Spectrum Conditions? If so, where from?

2. How has this information about Autism Spectrum Conditions been cascaded and distributed throughout your practice?

3. How has this had an impact on how staff support patients with Autism Spectrum Conditions?

4. Can you give any examples of how your service has made reasonable adjustments for patients with Autism Spectrum Conditions? E.g. a quiet place to wait.

5. Do you feel staff within your service have enough information about how to signpost adults and children who may require a diagnosis or support around Autism Spectrum Conditions?

6. Please give any further information about training or specialism in Autism Spectrum Conditions undertaken by any of your staff

7. What additional information and support would you find valuable?

In particular -

- Any additional information that could be included in '*Autism: A Guide for GPs and Professionals in Worcestershire*'
- Availability of training for staff
- Resources and information to give to patients

Any further comments:

Many thanks for providing your feedback.

We will use the information gathered to make recommendations about how information and resources for health services in Worcestershire can be developed, including *Autism: A Guide for GPs and Professionals*.

We will also share current good practice about how services are currently supporting patients with Autism Spectrum Conditions in Worcestershire.
